

## TGB GROUP TECHNOLOGIES QUALITY POLICY

**TGB GROUP TECHNOLOGIES, S.L.** is a company with extensive experience in the design, distribution and manufacture of movement and translation components. Our trajectory has allowed us to diversify our business to different types of sectors (industrial, solar...), having presence in countries all over the world and guaranteeing the following:

1. The commitment to meet the explicit and implicit demands, requirements and expectations of all interested parts, as well as legal and regulatory requirements.
2. Based on TGB's strategic lines, the company's objectives are defined and disseminated at all levels of our structure.
3. The dissemination at all levels of our structure of Quality objectives, programs and criteria, defined from the analysis of the company's context.
4. The implementation of Quality indicators and the monitoring of the level of progress of the same, so that we can know and ensure the product and the level of quality desired by our client and guarantee a rational use of natural resources.
5. The management of processes that reduce the environmental impact of our activity and to evaluate in advance the environmental impact of new activities or services.
6. The promotion of the rational use of natural resources and a clear awareness of favoring our environment, not only through our work, but also involving all our suppliers, customers and interested parties.
7. The development of continuous training program aimed at improving the qualifications of our workers, thus involving all personnel in the achievement of all the objectives set out in this document.
8. The commitment to the continuous improvement of the management system implemented in the company.
9. The promotion and achievement of a motivating environment for all members of the company.

Management makes this policy accessible and available to its customers, all employees, suppliers and the general public.

The Policy is kept up to date through regular reviews, coinciding with management reviews of the system, in order to take into account changes in environmental conditions and feedback. In this sense, the management provides and will provide all the human, technical and economic means necessary to achieve the objectives and goals that are established on a programmed and periodic basis.
